HP is a technology company that develops and provides a wide variety of hardware components, software, and related services to consumers, small and medium-sized businesses, and large enterprises, including customers in the government, health, and education sectors. It is especially known for its wide variety of printers.

Unfortunately, some users have run into issues when trying to use HP printers. People report receiving an error code 0xc19a0003 in Windows when attempting to print. Along with the error, a lot of people saw an ink system or printhead failure message. Although it is unknown what exactly could be causing this, there are a couple of troubleshooting steps users can perform.

# How to Fix HP Printer Error Code Oxc19a0005

## 1. Perform a Power Reset

With the printer turned on, disconnect the power cord from the printer

Unplug the power cord from the power source

Wait 60 seconds

Reconnect the power cord to a wall outlet and to the printer

## 2. Clean the Printhead of the Device

Open the HP Inkjet Utility

Begin with cleaning the toolbox's printhead. The Toolbox has to be opened for this purpose

Then choose Printer Services

Select the option stating Clean Print Heads

Read the instructions on the display and administer them

Now, open the HP Inkjet Utility

Click on the Clean option and follow the on-screen instructions to complete the process

### 3. Reinstall the Ink Cartridges

Turn on your HP Printer

Access the lid for opening it

When the cartridge carriage moves to the central position, you have to take out the cartridges

Spread a clean sheet of paper on a surface and place the cartridges over it

Now, clean the seats of the cartridges and then reinstall them

Ensure that the cartridges have been correctly seated

After closing the lid, perform a test print

### 4. Restore Your HP Printer to Factory Settings

- Push the button for **Menu** on your printing device
- Head to **Preferences** via the arrow icons
- Now, make a selection for the option of **Restore Defaults**
- Press **Ok**

## 5. Update HP Printer Drivers

- Press the **Windows key** and search for **Device Manager**
- Select the printer that you've connected from the list of available devices
- **Right-click** the device and select **Update driver** or **Update driver software**
- Click **Search automatically for updated driver software**
- Follow the on-screen instructions to install the updated driver
- **Restart** your computer

## 6. Contact HP Support

If none of the steps fixed the error code 0xc19a0003, you should contact HP support and they will assist you further.

- Go to the [official HP Support page](#)
- Choose how you want to contact them
